

Global Health Initiative
**Changing stories
 around the globe**

At Medline, **we're removing the barriers** that prevent people from getting the **safe, affordable healthcare they deserve.** We're bringing our knowledge, our experience and our volunteers to the places that need us most.

What happens when people don't have access to healthcare?

<p>Their quality of life is affected</p> 	<p>Providing for their families often becomes more challenging</p> 	<p>They face a greater risk of dying from treatable diseases</p> 
--	---	--

How we're making a difference:

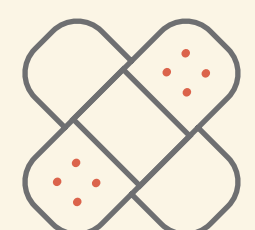

Our 3 areas of focus include:

- 1 Supply chain optimization**
 - Improving inventory management
 - Lowering costs and reducing waste
- 2 Perioperative efficiency**
 - Reducing OR turnover time, so clinicians can see more patients
- 3 Health education**
 - Training clinicians on wound care best practices
 - Reinforcing everyday healthy habits like hand hygiene

We're making healthcare run better, everywhere we go

Our 2019 impact:

 <p>Removed 5 truckloads of excess and expired supplies</p>	 <p>Educated over 1,000 children and their families on proper hand and oral hygiene</p> <hr/>  <p>Cleared 1,000+ square ft of space</p> <p>Trained over 200 nurses on skin and wound care best practices</p>	 <p>Hand delivered over 1,000 kits filled with essential medical supplies</p>
